

# ZIPWALL

*The professional solution  
for creating a temporary  
containment barrier*

# ZIPWALL is so easy to install

Clamp the sheeting between the two piece head assembly

Apply tension with spring loaded poles and simply twist to lock into place

Slip sheeting under the poles and pull sheeting taut in both directions

## *Zipwall telescopic poles have many excellent features:*

- Pivoting head joint that allows for use against sloping ceilings and cornices.
- Sound floor to ceiling grip with non-slip rubber head plate and foot/disc.
- Standard poles that extend from 1.4m - 3.7m / Extra long poles that extend from 2.0m - 6.4m.
- Can support a range of sheeting including polythene, light tarps or drop sheets.
- Can be used as support props in light weight installations (up to 50kg per pole).

Connect 1.5m long foam rails to Zipwall poles to create a tighter seal against ceilings.

Attach side clamps to foam rails and poles to obtain seal against walls and columns.

## **Zipper Access**

Apply double sided self adhesive zippers onto sheeting & cut open to create a doorway.

**PREVENT A PAINTING, SANDING, GRINDING, CUTTING OR DEMOLITION JOB FROM BECOMING A CLEANUP NIGHTMARE**

Dust inhalation adversely affects the health of a large number of people nationwide across a broad range of work activities. The ZIPWALL screening system is the proven solution to prevent dust from contaminating the environment and the personnel in it.

SET UP  
IN LESS  
THAN  
**5**  
MINUTES

**Award Winning Barrier System**

**ENHANCE YOUR PRESENTATION...**

**ENSURE YOUR COMPLIANCE..**

**GAIN THE PROFESSIONAL EDGE.**

ZIPWALL IS A SYSTEM of adjustable spring loaded poles that create a cutting room, spray booth or temporary barrier to your requirements every time. Ideal for containing dust in renovations, refurbishment, demolition and maintenance in sensitive or occupied areas.

- No ladders, tools, tape or fixings required
- No damaged walls, ceilings or floors to repair
- Reusable 100's of times over
- Fits into a 1.8m long carry bag

**Caution Reel Safety Barricade**

***Set up around your work area, or any other hazardous or sensitive zone.***

Simply pull out the caution tape and clip to each ZIPWALL pole for a tidy, professional safety barrier. When finished, just reel it back in to reuse next time. The reel pack can also be used in conjunction with sheeted ZIPWALL barriers.

# ZIPWALL *the innovative solution*

- Rapid installation – ***Saves time!***
- Can be used time after time – ***Saves money!***
- No tape, no nails or screws – ***Saves damage!***
- Provides complete seal – ***Stops dust spreading!***
- No ladders or trestles needed – ***Improves safety!***

ZIPWALL is available as separate units or in ready made kits. These kits offer different combinations of poles and accessories designed to fulfil varied requirements and applications. The sturdy carry bags can hold a large quantity of ZIPWALL making it an integral part of your work equipment.

**THAT MESS, MINIMISE CLEANUP TIME,  
AVOID COSTLY DAMAGE AND REPAIRS**
